

REVIEWING ITS WORK

Council Checks Over Things Done and Remaining Undone

POSTPONE ACTION ON EXPANSION

Push Cleaning Crusade and Decide to Force Street Railway Company to Improve Streets in Accordance With Terms and Specifications of Franchise

Reviewing the things that should be done and those that have been ordered done consumed most of the time at the meeting of the council last night. The extension of the city limits was again taken up and considerable time devoted to it. While no definite action was taken, it was decided to arrive at some conclusion by the next meeting and take the preliminary steps in enlarging the corporate limits. Despite the fact that there has been a strong protest from the owners of the lands in the addition that the council proposes to annex there is a strong determination to bring them into the municipality, and the council is very much in favor of an election at an early date. The matter has been delayed heretofore because the council wanted further legal advice on the method of procedure. Attorneys hold antagonistic opinions on the question and it is quite evident that the result will be a law suit that will force the city into the Supreme Court of the state. The council is, however, determined to bring the question of expansion to an issue and it may be expected that shortly after the next meeting steps will be taken to submit it to the voters of Klamath Falls.

The council also gave some of its time to the cleaning crusade that was inaugurated a short time ago. The work in this line that has been accomplished was reviewed and that which still remains undone was discussed with the result that it was agreed that the crusade be pushed and that the officers be instructed to see to it that the city receives a cleaning wherever it is needed.

While the time was being consumed by the discussion of the needs of the city in a way of cleanliness, some one mentioned the bad condition in which the Klamath Falls Land & Transportation company had left the streets after the completion of its

street railway. This matter was given considerable serious thought and it is the intention of the council to force the company to put Main street in such condition as is required by the terms of the franchise under which the railway company is operating. The object of the council is to get the streets in such shape that the extremely muddy conditions that prevailed during the last wet season will not be repeated during the ensuing year.

The regular routine business was transacted and a few sidewalks and fences in various parts of the city were ordered moved back so as to vacate the streets. The session lasted through more than two hours, but most of the time was devoted to a discussion of the questions mentioned.

Game Warden Is Covering Ground

Game Warden G. W. Gibson went to the north end of the county today. He is going out after some of the parties who are hunting deer and other game without licenses. Mr. Gibson carries a license book with him and anyone can secure a license from him at any time so that it will not be necessary to make a trip to this city. This section is so large that one warden finds it extremely difficult to cover all parts of it in a satisfactory way.

Notice to the Public.

The fire ordinance of the City of Klamath Falls covers all of Main street from the bridge across the river to Eleventh street and any and all parties desiring to erect new buildings in that district, make repairs or build additions must first secure a permit from the council. All parties violating the ordinance will be enjoined from continuing with the work.

JOHN R. SHULTS, Mayor.

Will Make Dirt Fly Early Next Week

W. H. Mason, who was awarded the contract for the construction of the seven mile extension of the South Branch canal, is mustering his forces and expects to make the dirt fly by the first of next week. He has until December 15th to complete the contract, but it is his intention to put on force enough to have it finished by the middle of October.

R. W. Smith will begin pitching his camp tomorrow and he expects to be established in a few days and have a force of sixty men on the job. This will be the main camp of the construction work.

Lawton & Gallagher have subcontracted the last half of schedule five and will begin work on it at once. Within a few weeks there will be considerable activity in the Mason contract and work will be pushed in every quarter.

Building Wharf on Upper Lake

Splendid progress is being made on the wharf being built by the Long Lake Lumber company on the Upper lake water front leased by the company from Major Chas. E. Worden. The new wharf will become a popular landing place for small crafts as well as for some of the larger of the boats for a boathouse will be built where all the launches plying the waters of the Upper lake may land without paying any rental.

The work on the landing is being pushed and it will be but a short time until the landing will be in such shape that it will be ready for the public. The Long Lake company will use the landing for unloading the large shipments of lumber that it is bringing down from the Odessa mill and which is being used in the construction of the large government dam. It is said that the new landing will be in a convenient location and will be arranged for permanent use.

WATER IN SIXTY DAYS

Adams Dredge Employed by the Southern Pacific on Dike to Channel

Another strong indication that E. H. Harriman meant what he said when he stated that the California Northeastern would be completed to navigable water this fall is the fact that there is renewed activity in the construction of the road to the marsh. On the heels of the announcement that the road is to be turned over to the operating department as far as Calor just as quickly as it can be put in shape for service develops the fact that the J. Frank Adams dredge has been leased by the Southern Pacific and will at once begin work on the dike from the channel to the shore line. This puts three dredges on the job and since the Adams machine has been leased for only twenty-five days it is evident that the engineers expect to have the grade completed within thirty days. This being the case it will not be longer than sixty days before all freight and passenger traffic will be carried on to this city by water from the point where the railroad intersects the channel. Work is being rushed on the line where it approaches the marsh and parties coming from there say that additional surveying crews are in the field and there is renewed activity in all of the construction camps.

There can be no occasion for this hustle and bustle unless it means that orders have been issued to rush the line to completion. This activity following the statement by Mr. Harriman that the road would reach the water this fall and this city in the spring means that Klamath Falls will not be dependent upon stages and freight wagons this coming winter, but will have train and water service in about sixty days that will be equal to that of most places situated on the railroad.

PICTURES GOOD ADVERTISING.

Local Photographers Up-to-Date in Getting Out Current Views.

Photographs are one of the best mediums of advertising and the Klamath section has offered many opportunities for this line of publicity. Pictures of the arrival of the Harriman party and various scenes connected with the distinguished visitors were on postal cards and on sale only a few hours after the party arrived in this city. J. B. Hulse has also on sale at his studio pictures of the Governor as he was delivering his address in the court house yard.

The photographs were taken only yesterday evening, but at an early hour this morning he was displaying a number of postal views showing the Governor in characteristic speaking attitudes. The demand for these photos as well as for the Harriman postals has been very strong and hundreds have been sent out. The photographs have been kept busy turning out views which, when sent out, are among the best advertisements that the country can get.

Hundreds of views of Harriman and his party have been sent out and likely Mr. Hulse, who secured the only views of the Governor and his party, will have a call for many of the splendid postals that he has on sale at his studio.

Local Bear Story Travels Eastward

The fact that the thirteen year old son of E. H. Harriman succeeded in killing a three hundred pound bear in the mountains of Klamath has given this section a vast amount of valuable advertising. Accounts of the feat appeared in many of the large Eastern dailies and much space was devoted to telling about the Harriman home in Oregon.

There are few boys in Oregon the same age as Master Roland who have succeeded in killing a bear and the fact that the boy coming from New York was successful in bagging one is evidence that the hunting in the Klamath country is unequalled in any part of the United States.

Must Take Out Building Permits

Tonight the council will hold a special meeting for the purpose of granting a number of building permits in the fire district of the city. It has been brought to the attention of the council that there are a large number of people in the city who do not know that in order to build in any part of the city that it is necessary to secure a permit from the council and in the fire district no repairs or improvements can be made without permission from the council.

In one of two instances parties have gone ahead with improvements

ENJOYS PELICAN BAY

Harriman May Remain at Lodge Few Weeks Longer

SURROUNDINGS AGREE WITH HIM

Boys Will Remain for Duck Season and Likely That Entire Party Will Not Leave Klamath Country Before the Middle of September or Still Later

In the fire district without asking the permission of the council and it was not discovered by the council that the improvements were being made until the work was done. Recently a number of changes were made in the Monarch, but work was stopped this morning on account of not having a permit from the council and in order to let them go on with the improvements, if the council sees fit, a special meeting will be held tonight to issue a permit. Other parties who are building in the city limits will also appear before the council to get permission to complete the buildings.

While in session the council will take up any matters that may come before it and likely considerable business will be transacted.

Bank Takes Over White Building

The stockholders of the First National Bank held a meeting last night at which time the bank took over the G. W. White property on the corner of Main and Fourth streets and the building will be completed by the institution. As soon as it is completed it will be occupied by the bank.

A. D. Miller, Judge L. F. Willis, Dr. W. A. Leonard, John Stickel, and G. Heitkemper, Jr., left this noon for a few days bear hunt in the vicinity of Pelican Bay. It is understood that they will make an attempt to get thirteen-year-old Roland Harriman to go out with them to show them how it is done.

C. P. Chastain, Harold Merryman, Francis J. Bowne and the Misses Hannah and Mabel Bowne, Mabel Campbell and Edna Jensen leave tomorrow for a two weeks' trip to Crater lake, Spring creek and the huckleberry patch.

All reports coming from Pelican Bay are to the effect that Mr. Harriman and family are enjoying their visit and they have not set any date that will terminate their stay at their beautiful mountain home in Klamath. Mr. Harriman is spending his days attending to the regular business that must be attended to daily and his chief recreation is fishing in the Bay. While he has made no large catch he finds it pleasant pastime and those who have seen him lately say that he is looking more robust than when he first came and he was in his usual good health when he arrived for a season of rest.

His sons are having the best hunting that the country affords and find game plentiful. With their friends and guides they spend most of the time in the mountains hunting for deer and bear. They have found several of the latter, but Roland is still the only one in the party that has succeeded in killing one. Deer are plentiful and the hunters have supplied the Lodge with venison.

It is not known just how long Mr. Harriman will remain, but it is announced that the boys will be there long enough to get a few weeks of duck shooting and as the season does not open until September 1st it is certain that all of the party will not leave until the middle of September, and as Mr. Harriman is very fond of his boys and would scarcely be expected to leave them here while he went East it is very probable that his visit too may be extended for at least four more weeks.

A number of guests are expected at the Lodge in the next few days which may be taken as another indication that Mr. Harriman and party have no intention of leaving any time soon.

Merrill Valley the heart of Klamath.

Ladies!
